Completion

ML

NOTE: Site is currently being graded. Grading contractor reports that the upper 9 feet of the site has been excavated and re-compacted. A geo-membraine and gravel has been placed at approximately 8.5 feet bsl to stabilize saturated soil conditions.

Dark tan to brown very fine grained silty, clayey, sand.

GW

Dark tan to brown very fine-grained silty, clayey, sand and gravel. Geo-membraine encountered at 8.5 feet bsl. Aparent fill

ML

Dark tan to brown very fine grained silty, clayey, sand.

MH

Dark olive fine-grained clayey sand and silt, Saturated. No Odor

SP

Dark grey to Salt & Pepper, fine to very fine grained unconsolidated sand. No Odor

MH

Olive to olive with brown mottling, very silty clay. Slightly firm/slightly stiff. No Odor
